# WHY SHOULD YOU LISTEN TO ME?

Four years ago I was a broke college student. I signed up for multiple trading academies and subscribed to various trading communities in an attempt to educate myself. Excitedly, I began trading with the money I had saved. Sadly it was all gone in a flash due to my lack of information and proper guidance. I struggled for years making the same mistakes most new traders make; overleveraging my trades, trading without a stop loss, watching my trades constantly.

I've been there, done that and thankfully I have learned from my mistakes. Today I educate thousands of students helping them to become profitable in Forex. I have developed a signature trading strategy that I use to make hundreds of thousands of dollars trading in the Forex market. I will teach you how to apply my signature trading strategy to identify high probability trade setups and profit consistently in Forex.

Now let's look at the top 5 ways to gain consistent profits trading forex. If you will apply these specific steps you will soon be **confident, happy and profitable**.

## 1. PROPER COACHING AND MENTORSHIP

I have tried many trading companies, overpaying for useless strategies and struggling to understand complex methodologies. I had no idea how to approach the market, no step-by-step instruction on how to assess the markets and no one to guide me along the way. No wonder I exhausted my account over and over again.

When I met Richard he was unsure that he possessed the skills necessary to be successful in the field of trading. He felt discouraged and hopeless because his losses greatly exceeded his gains. I connected with Richard on a [Provision For Your Vision Strategy Session](#) where I meet 1-on-1 with traders seeking mentorship to help them to change the way they look at this industry, identify the #1 obstacle to achieving their goal, and map out a 3-step action plan to help them get clarity, consistency and profitability.

*Richard almost didn't reach out to me because of his busy accounting job. In talking to Richard, I discovered that his top constraint was lack of personal development and I prescribed a specific course of action. Richard implemented the plan and now brings in additional revenue in his spare time. Now Richard feels liberated, elated and positive because he finally has learned a skill that allows him the freedom to make money on his own time and on his own terms.*

## 2. PROPER RISK MANAGEMENT

The problem with most amateur traders is that they are introduced to this industry incorrectly. They are told that they can make millions in a short amount of time. They are exposed to these elaborate compound interest plans and they attempt to trade every possible currency. In my Forex Course, I will teach you how to properly trade to gain the wealth you desire, with a step-by-step plan on how to manage your money correctly.

### 3. DEVELOP A WINNING MINDSET

Let's face it, if you are not persistent and consistent your goal to gain wealth from the markets may be unattainable. Fear of loss is a real enemy that tries to consume new and not-so-new traders but with a transformed mindset you will overcome this temptation and go on to long-term success.

Justin is a scalp trader who was trying to trade too many strategies. He felt overwhelmed, anxious and unmotivated. When I met Justin on a Provision For Your Vision Session he was at the end of his rope and thought he would never be able to solve the problem.

*Justin almost didn't reach out to me because he thought it would be too expensive to work with a currency coach. In talking to Justin I discovered that his top constraint was a poor mental outlook and I made three simple recommendations. Justin implemented the plan and is now consistently profitable. Now Justin feels relieved, relaxed and refreshed because he finally has developed the winning mindset.*

## 4. WHAT NO ONE TELLS YOU ABOUT PATIENCE

With the urgent need to grow capital to take care of bills and have an extra stream of income, patience is what most people have the least of. It is the simplest and most effective attribute that a trader can have. Without patience, a trader in the market is likely to lose most if not all of their capital and will be inconsistent in the markets. My clients who have completed my course have had this instilled in their strategy and they are now efficient and accurate and can manage their money without fear or greed.

## 5. EDUCATION: THE KEY TO TRUE FINANCIAL FREEDOM

This is the icing on the cake. Without world-class education, the previous four points can only make you average. The single greatest investment a trader can make is not in the capital but in his education as it will protect him and multiply his capital in time. In my course, you will receive access to world-class accredited forex teaching and tools
